

## About the London InterCommunity Health Centre

London InterCommunity Health Centre has been a part of your community for more than 25 years. We provide health and social services in a welcoming setting to individuals and families living across the city of London. The Health Centre is committed to creating an inclusive and safe space for all sexual orientations, gender identities and gender expressions.

Our two East London locations offer care by a team which includes doctors, nurse practitioners, nurses, social workers, dietitians, mental health specialists, health promoters and community health workers. The Health Centre also offers many programs that address the factors in our personal lives that affect our health. These include income, education, housing, food security, recreation and social supports. At the Health Centre, our vision is: building opportunities for healthy and inclusive communities.

## Diabetes Prevention and Care

Last Updated: November 2015

Every One Matters.

## Please tell me about your diabetes programs.

At the Health Centre we have a long history of providing education and health services to people with diabetes as well as people who are at risk of developing diabetes.

We believe that you can learn to live well with diabetes – to manage medications, diet and activity in a way that feels right for you. Our Diabetes Care Team – which includes registered nurses, registered dietitians, a social worker and a foot care provider – is here to help you take good care of yourself.

We have experience working with newcomers who speak languages other than English, as well as those who come from many different cultural backgrounds. We work with people who have a low income, don't have transportation, live with mental illness or are homeless.

## What type of services do you offer?

Our Diabetes Care Team offers many monthly groups that will give you reliable, up-to-date information about learning to care for yourself.

At these groups you can talk with others who may have the same concerns that you have. We are interested in your questions and always leave a lot of time to talk. You are welcome to bring a family member or friend with you so that he or she can also ask questions.

In addition to attending groups, you may meet one-on-one with a nurse, a social worker or a dietitian about your diabetes concerns. Clients of the Health Centre can also access our registered foot care provider.

Some clients also choose to use a Personal Care Card for their HbA1c and weight. You can use this information to keep track of your health. You can also share this information with your family doctor or other health care provider.

## Who can use your diabetes services?

Our diabetes services are open to the entire community. You do not need to be a regular client of the Health Centre and you do not need to live in our neighbourhood. While some of our monthly groups are held at our Dundas Street location, many are held at other locations in the city such as community centres or places of worship.

Translation is provided for those who do not speak English.

## Do I have to pay for this program?

No. There is no cost to you.

## How can I learn more?

For more information, please call Stephanie McCulligh, Team Leader at 519-660-0874 x320.
